#### **DETAILED ACTION**

#### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Cheng et al.

Cheng et al teaches a method for polishing a wafer which is polished by continuously driving a surface late, 101, on which a plurality of polishing pads, 201, made of polyurethane foam, (col. 4, lines 38-39), are stuck, the surface of each pads being provided with a plurality of grooves each extending linearly in the drive direction of the pad, wherein in the sticking step, the polishing pads are stuck on the surface of the plate, (col.5, lines 49-60), in such a manner that the grooves of each of the polishing pads are spaced not to align with the respective grooves of the polishing pad adjacently arranged in the drive direction and therefore are offset by a predetermined distance form the grooves of the polishing pad adjacently arranged, (fig. 5. if the mosaic pads are placed adjacent to each other, the grooves will not align). Cheng et al. also teaches a plurality of grooves extending linearly in the drive direction of the polishing pad which are formed over the entire width, at regular intervals, from edge to edge of the polishing pad in the direction perpendicular to the drive direction.

#### Response to Arguments

Applicant's arguments filed 6/22/05 have been fully considered but they are not persuasive. The Applicant argues that the grooves 503 and 502 do not extend linearly in the drive direction. In the previous action, it was argued that a component of the grooves 503 extend linearly in the drive direction. The grooves 503, and 502 do have a component, meaning they do extend in the linear drive direction. The grooves will have a component in the linear direction unless they are completely perpendicular to the drive direction. The grooves run parallel and also grooves 502 and 503 run from one edge to the other edge across the width.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shantese L. McDonald whose telephone number is (571) 272-4486. The examiner can normally be reached on 8:00 a.m. - 4:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail can be reached on (571) 272-4485. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

#### **BEST AVAILABLE IMAGES**

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:
BLACK BORDERS
☐ IMAGE CUT OFF AT TOP, BOTTOM OR SIDES
☐ FADED TEXT OR DRAWING
☐ BLURRED OR ILLEGIBLE TEXT OR DRAWING
☐ SKEWED/SLANTED IMAGES
☐ COLOR OR BLACK AND WHITE PHOTOGRAPHS
☐ GRAY SCALE DOCUMENTS
☐ LINES OR MARKS ON ORIGINAL DOCUMENT
☐ REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY
□ OTHER.

### IMAGES ARE BEST AVAILABLE COPY.

As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.
